

bioinorganic chemistry

an interdisciplinary journal

**devoted to all aspects of
biological inorganic chemistry**

Volume 6 • 1976

ELSEVIER

New York

bioinorganic chemistry

an interdisciplinary journal

seeking to establish direct
communication between inorganic
and biological chemists

Papers are invited on the following subjects: the chemistry, structure, and function of metalloenzymes and of coordination compounds of biological interest; the interaction of inorganic compounds with proteins and nucleic acids, the enzymatic and nonenzymatic biochemistry of small molecules, elementary biocatalytic processes, the fundamental aspects of enzyme action, enzyme models, the prebiotic synthesis of biologically important organic compounds, the function and distribution of trace elements in living systems, and related subjects.

EDITOR

G. N. SCHRAUZER

Department of Chemistry, Revelle College,
University of California, P.O. Box 109,
La Jolla, California 92037 U.S.A.

EDITORIAL BOARD

JOHN C. BAILAR

University of Illinois

FRED BASOLO

Northwestern University

ERNST BAYER

Universität Tübingen

GUNTHER L. EICHHORN

National Institutes of Health (U.S.A.)

SABURO FUKUI

Kyoto University

R. W. F. HARDY

E. I. duPont Nemours & Co.

FRANK M. HUENNEKENS

Scripps Clinic and Research Foundation

L. L. INGRAHAM

University of California, Davis

MARTIN D. KAMEN

University of California, San Diego

NATHAN O. KAPLAN
